PRODUCT CATALOG 2017

START

The image features a dark background with a glowing blue outline of a car's dashboard or control panel. On the right side of the dashboard, there is a rectangular button with the word "START" written on it. Below the dashboard, there are two horizontal glowing lines, one red and one yellow, suggesting a power or lighting system. The overall aesthetic is futuristic and high-tech.

# THE STORY OF KAJOT

Our objective is to be a high-quality partner and supplier of comprehensive solutions in the entertainment and gambling industry. We focus on the demands of exacting clients, keep up to date with global trends and apply them in our products.

We have now been bringing you great gaming fun since 1996. We have our own development and manufacturing centre, and a team of graphic artists, designers and programmers. Only by following this route can we achieve the quality our partners demand and for which we are rightly proud.

The complete and professional service of KAJOT slot machines on Kaštanová Street.

KAJOT TECHNOLOGY CENTER

WE HAVE BEEN **DEVELOPING, MANUFACTURING AND OPERATING** GAMING SOFTWARE AND GAMING MACHINES SINCE 1996.

# CASINOS

Our company is among the most important central European manufacturers and operators of gaming machines. These are located in hundreds of establishments across the region.

More than 100 companies operate using our products.

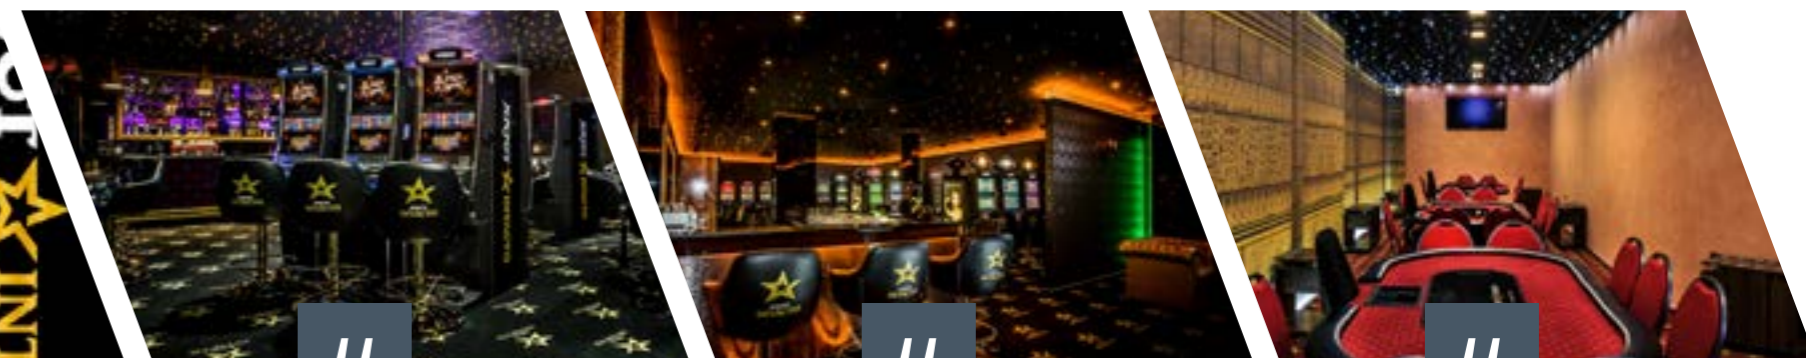

# 20 YEARS OF EXPERIENCE

We have many years of experience running casinos, including live games (poker, blackjack etc.).

We have been building gambling establishments for over 20 years.

We have manufactured tens of thousands of gaming machines, bringing players fun and unbeatable experiences.

# KAJOT games

## GAME DEVELOPMENT

Absolutely crucial innovation in the product portfolio of company KAJOT represent online games. Newly created division prepares the most successful games reprogrammed into HTML5.

Online games are both our priority and the future. You can find out more about our online games from our sales representatives.

# GAME DEVELOPMENT

We have our own complete in-house team specialized in professional game development. We have the very best programmers, graphic designers, mathematicians and testers.

Our team is constantly growing by experienced and talented professionals in the field. Thanks to this we are creating a product on which we are rightly proud..

# NON-STOP INNOVATION

All our products are developed at our own production facilities: from initial analyses, through to designs and visualizations, and finishing with the manufacture of the machine itself. Our constructors design products that satisfy our customers' most demanding requirements.

# FROM CONCEPT TO REALIZATION

We create slot machines that have a real spirit, style and atmosphere. For more than 20 years, now, we have been experts in the creation of gambling arcade and casino interiors. We supply a complete interior design, a visualization of the space, and then carry out the realization.

Our design elements are purchased from all over the world, but always comply with regional requirements and match the taste of visitors.

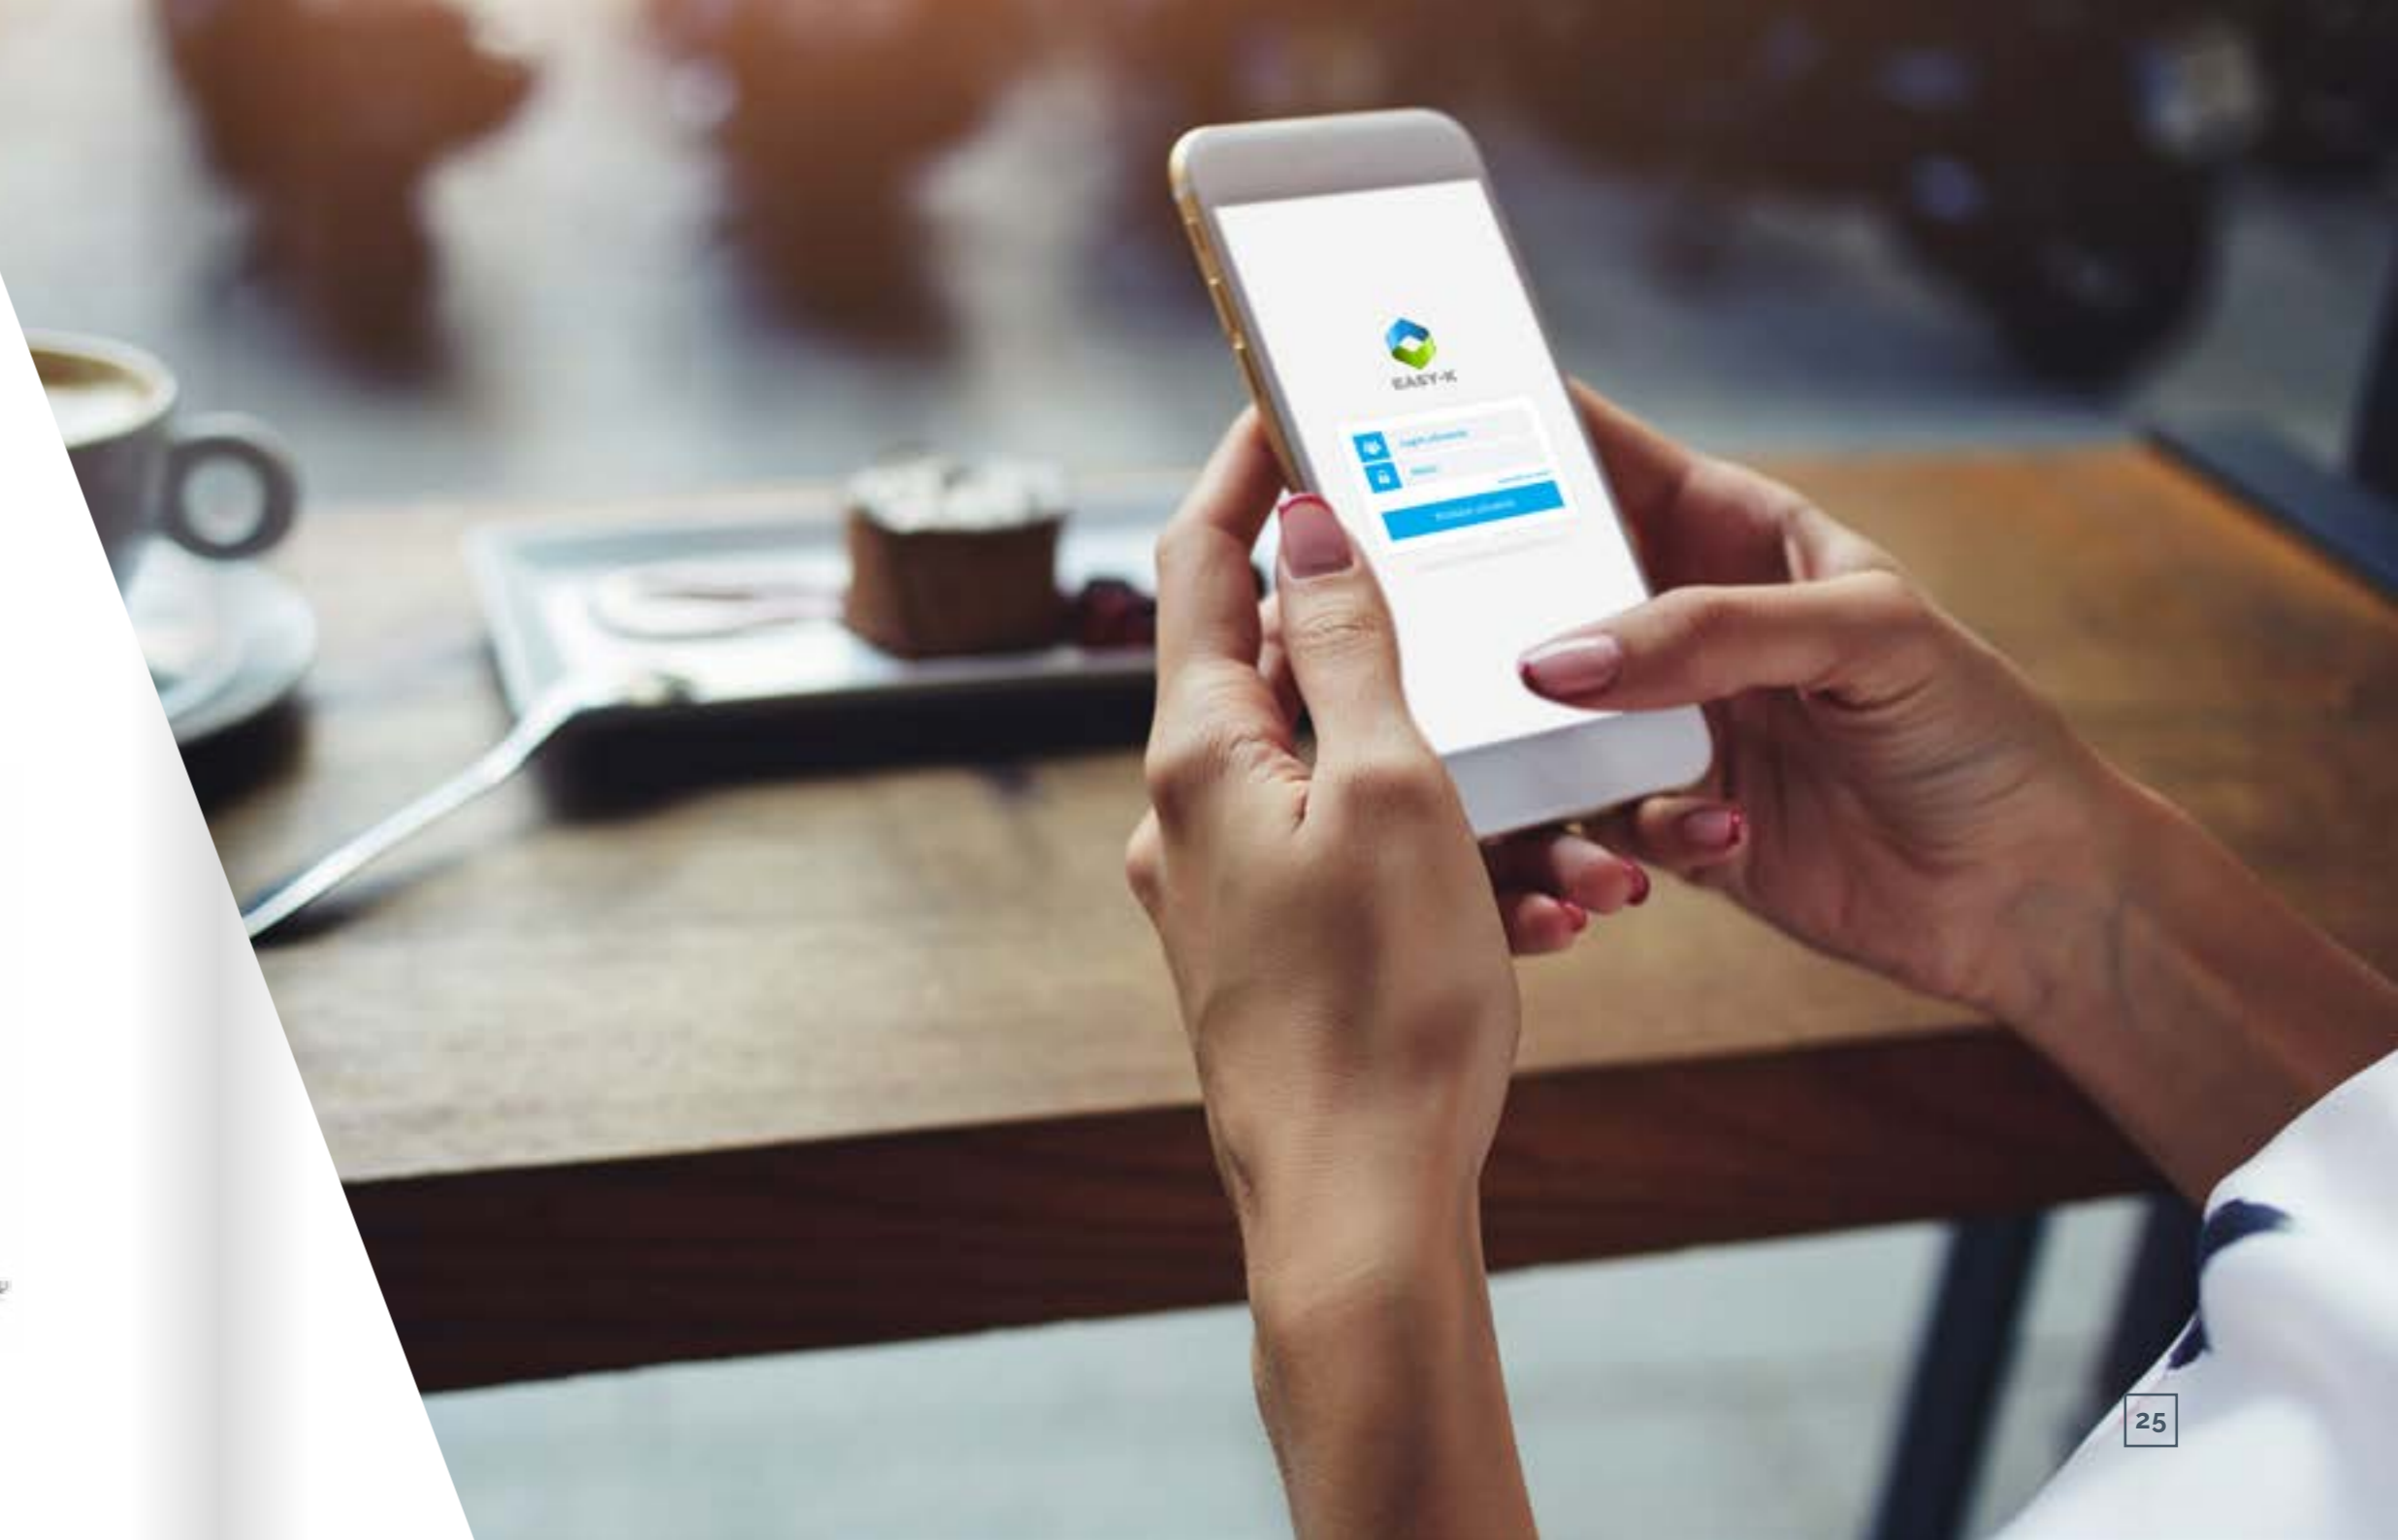

# EASY-K

## INFORMATION SYSTEM

EASY-K is an original IT system for easily and effectively operating all types of gaming machines and meets the strictest criteria for the financial, technical and administrative control of their operation.

- Comprehensive system for operating gaming machines
- Option for individual user setting of the working environment
- Constant monitoring of the operation of gaming machines, on-line data collection
- 24/7 email notifications according to set values, emailing managers' reports

# TECHNICAL SUPPORT

- Quality service and support is one of the basic pillar of successful cooperation with our business partners. We provide clients ongoing support 24/7.
- In order to provide maximum security for the functioning of the entire CLS gaming system, KAJOT servers are situated in a professionally administered housing centre, which provides our company with a first-class service.
